

ATS Score & Hiring Chances Report

ATS Score & Hiring Chances as a Fullstack MERN Developer

Your ATS (Applicant Tracking System) score is determined based on how well your resume matches job descriptions in terms of keywords, formatting, and relevant experience. Here's an assessment of your resume:

ATS Score Breakdown

Criteria	Score (Out of 10)	Comments
Relevance of Job Title (Fullstack Developer)	9	Clearly mentioned
Technical Skills (MERN Stack, Git, APIs, etc.)	10	Strong stack with relevant skills
Experience (Internship at LevelX)	8	Intern experience is good, but full-time job experience would boost score
Projects (Practical Hands-on Work)	10	Multiple real-world projects with APIs, authentication, payments, and real-time features
Education (CS Degree)	8	Bachelor's degree is relevant, but advanced certifications would help
Keywords for ATS Optimization	7	Good use of skills, but could include more industry-standard keywords like "RESTful services," "microservices," "CI/CD," etc.
Resume Formatting (Readable & ATS-Friendly)	8	Well-structured but could use more bullet points and a summary section

Estimated ATS Score: ~85% (Very Strong Resume)

Your resume has a high chance of passing ATS filters for Fullstack MERN Developer roles, especially for entry-level or junior positions.

Hiring Chances as a Fullstack MERN Developer

Strengths:

- * Strong project portfolio (Story-Cave, AI Developer, TweetMe)
- * Good grasp of MERN stack (Node.js, Express, MongoDB, React)
- * Experience in real-world applications (API integration, real-time features, payments)
- * Internship at LevelX (Gives industry exposure)
- * Active GitHub profile (Demonstrates coding skills)

Areas to Improve:

- Build more production-ready applications (Optimize for scalability, security)
- Contribute to Open Source (Increases credibility and visibility)
- Improve Resume Keywords (Add terms like "RESTful APIs," "JWT Authentication," "Microservices")
- Gain certification (if possible) in MongoDB, React, or AWS for a competitive edge

Hiring Probability:

- **Startup / Small Companies:** Very High (85%-95%) - Your strong project work and hands-on experience make you a great fit.
- **Mid-Level Companies:** Moderate to High (70%-85%) - May require more experience or certifications.
- **Big Tech (FAANG, MNCs):** Low to Moderate (50%-65%) - Competitive, so focus on **DSA**, system design, and open-source contributions.

Final Recommendations:

- Apply for Junior/Mid-Level Fullstack Developer roles in startups and growing companies
- Strengthen DSA and system design for long-term growth
- Network on LinkedIn, contribute to open-source, and work on personal branding
